Name _____ Address _____

Welcome the Newcomer

The immigration season is just opening, and, judging from all reports and present prospects, Canada is due to receive a larger influx of settlers than in any year since the period between 1900 and the outbreak of the war.

This increasing stream of people Canadawards results from a number of factors. In the first place, conditions in Europe are more favorable than they have been since the upheaval caused by the war, and people who have long been anxious to emigrate are better able to do so. Canada, too, has somewhat relaxed the restrictions imposed on immigration following the war and when this country, like all others, was faced with the problems of readjustment and the reestablishment in civilian life and employment of the hundreds of thousands of Canadians whose energies had been devoted to war activities and industries. Until our domestic problems of unemployment and rehabilitation had been solved it was generally considered unwise to allow any large numbers of new people to enter the Dominion.

The economic and financial situation throughout Canada has likewise enormously improved: employment is now general; great development enterprises are under way; railway and building construction is increasing; trade and commerce is steadily and rapidly expanding.

Agriculture has enjoyed several fairly prosperous years, and, whatever may be the difficulties yet to be overcome, they are being faced and solved, with the result that the Canadian farmer is today in a much better and more hopeful position than is his fellow agriculturist in the United States. The Canadian farmer through organization and cooperation has successfully met problems which still confront the United States farmer, and solutions to which he asks government authorities to provide.

The success of the Western Pools, the steady reduction in taxation, Federal, Provincial and Municipal, decreasing railway deficits, increased railway branch line construction, all are helping factors in the economic structure, leading to confidence in Canada and encouraging to intending emigrants as providing substantial reasons why they can succeed in this country.

But, as has been stated in this column on more than one occasion, successful colonization is much more important than quantity in immigration. Canada wants more people, no one disputes that fact. But, above all, Canada's future, growth, prosperity and sound national development demands that our immigrants be transformed in the shortest possible space of time into contented, law-abiding, prosperous people, resulting in permanent homes and good citizens.

To achieve this much to be desired end, governments, railways, and organizations of many kinds are doing much and can do more, but, in the final analysis, municipal and school bodies, and the individual neighbors of these newcomers can exert the most powerful and helpful influence. Every rural municipal council, every rural school trustee board, should in itself be a small local colonization board, alert and ready to make welcome each and every incoming settler, regardless of his race, creed or circumstances in life.

Present settlers should make it a part of their duties of citizenship to extend a hearty welcome to their new neighbors, to offer such advice as may be necessary, and give a helping hand in time of sickness or difficulty. These newcomers, if thus encouraged, will become permanent residents. As such they will help to develop the district and the Province. They will bear their share of the tax burden, and thus lighten it for all. Their presence will mean better roads, better schools, and the possibility of modern conveniences now considered out of the question because of cost to the present sparse and scattered population.

The eyes of the world, and especially of Great Britain and the rest of the Empire, will be focused on Canada in this year of its diamond jubilee. Tens of thousands of people will come to make their home in this Dominion. Their success in the great adventure means everything to them, but it will also mean much to the future of all Canada. No Canadian of today can render greater service to the country than by doing all that lies in his or her power to make (immigrant) to the Dominion this year successful by the conversion of the newcomers, through sane and practical colonization, into permanent settlers and worthwhile citizens, the greatest asset of any country, and the only abiding foundation of national greatness in the truest meaning of the term.

Line for Jungle Airway

For a jungle airway from Kharoum through Central Africa to Kisumu in the King's colony, a distance of 1,200 miles, a big triple screw air liner will be being designed in England. It will be based on the flying boat built for the Air Ministry which proved to be the fastest in existence. Owing to the presence of rivers, lakes and eddies, the more energy is required to produce a sound; second, that the possible by using seaplanes to alight than those of men.

Explanation is Simple

Talking fatigues women less than it does men, a French scientist says in a dry objective way, without entering into the controversy as to whether the female is more talkative than the male. The scientist explains his statement by two facts: First that the greater the length of the voice cords, the more energy is required to produce a sound; second, that the vocal cords of women are shorter than those of men.

Genuine
ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbargia
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package
which contains proven directions.
Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monosaccharide of Salicylic Acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Table of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Urge End of Wars

British Envoy to Washington Pleads
for Anglo-Saxon Unity

"The sort of unity I want to see grow up among the English speaking peoples is a unity of heart and understanding," said Sir Esme Howard, British ambassador to Washington in a speech on Anglo-Saxon unity, delivered before the Twentieth Century Club at Washington. "I should like it to be an accepted fact," he added, "in the mind of every man, woman and child in all English-speaking countries that come what may we still will never war with each other—that such a war would be like a duel between brothers—a thing unholy and impious, not to be even thought of."

"If we have to spend large sums on armaments," he said later on, "let us at least do so without reference to the armaments of the other but only considering our own necessities for protection generally. There can be no unity of heart or of purpose if we are going to begin eyeing each other with suspicion every time the other builds a new ship or devise some engine of destruction."

Speaking of conditions in Europe, Sir Esme reminded his hearers that Great Britain could not ignore the continent in her efforts to preserve Anglo-Saxon unity.

Drives Out Rheumatism
Subdues LumbagoBrings Ease and Comfort to the
Sufferer at Once

NERVILINE

A King Over Pain

Those who seek permanent relief from the grinding pain of Rheumatism and Lumbago should read the letter of F. E. Normand, from Georgetown, who writes:

"I was fairly crippled with aching joints and Rheumatism. Nerviline must have been what I needed, because it cleared up my trouble quickly."

"If you need a reliable, strong, penetrating pain remedy, one you can depend on, get a 35c bottle of Nerviline today; it will make you well quickly."

Only one mother of a president of the United States lived to see her son inaugurated—the mother of William McKinley.

CONDITIONS THAT
CALL FOR A TONICSymptoms That the Blood is
Thin Should Not be Neglected

Weak, lacking in strength, energy and ambition, nervous, sleepless, poor appetite, digestion disturbed, these are the symptoms of a great majority of people who have been benefited by the use of Dr. Williams' Pink Pills. The great value of this medicine in cases of this kind is proved by the statement of Mrs. W. Hensher, Kingston, Ont., who says: "Following a severe cold I was left in a rundown, nervous condition; I had pains in the back and hands and could scarcely move about. I did not sleep well at night and was despondent and discouraged. I decided to try Dr. Williams' Pink Pills, and can truthfully say that after the use of six boxes, the change in my condition was nothing short of marvelous. The pains vanished, I slept well, had a good appetite, and in every way felt well and strong. I also gave the pills to my daughter, who was in an anemic condition and feeling quite miserable, and in her case, too, they restored health. I hope my experience may help some other weak person."

Dr. Williams' Pink Pills are sold by all medicine dealers or sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont. A little book, "Building Up the Blood," which contains many useful health hints, will be sent free on request.

The easier it is to reform a man the sooner you'll have to do it.

Gores Flea Before it. — There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way exceeded by its low price.

Corns are painful growths. Holloway's Corn Remover will remove them.

As a woman's beauty fades her braids come to the front.

Ceremonies may differ, but true politeness is the same the world over.

Minard's Liniment for rheumatism.

W. N. U. 1672

Canadian Farmer
Tells His Experience

"Les" Booth, widely known Ontario farmer, and a sick man for 20 years, suffered daily, only half alive.

Now strong, robust, vigorous, credits new
found health to Tanlac

Though popularly known as "Les," Mr. Booth's correct first name is George. His home is at 271 Perth St., Brockville. For the past three years he has enjoyed vigorous health but what he endured before then is best told in his own words. "For twenty years my arms, shoulders, back and hips, ached with rheumatism," said Mr. Booth. "Often I had to quit work entirely and I remember one bad spell that kept me in bed for six months."

"My ease got to be so chronic that the help ran the farm. I was practically helpless. Even my wrists and hands would swell up so that I couldn't write my name. I dreaded bedtime, for I got no rest, but lay there in agony, waiting for morning. Nervous spells would seize me and I would tremble all over like a leaf. I couldn't get any benefit from my food and had to force myself to eat. My weight was far below normal."

"Three years ago I decided to give Tanlac a good trial, for nothing else had helped me. I could scarcely believe such results were possible as those Tanlac soon showed. The aching stopped, my appetite came back and I could eat heartily. My nights became more restful, too, and I slept

soundly. I gained 16 pounds which I still retain, and I now work hard outdoors from 8 to 10 hours a day. I never have an ache. It's hardly believable. If folks want to know what Tanlac can do, tell them to write to Les Booth, or to come and see me. I'll tell 'em."

If your health is broken from over-work or neglect, profit from Mr. Booth's experience. Try Tanlac, nature's own body builder, made from roots, herbs and barks. Your druggist has it. Over 52 million bottles sold.

Cancer

Alberta Oil Producers

Three different types of oil are being produced in the Turner Valley field near Calgary. Royalty No. 4 and Vulcan are producing naptha, Illinois-Alberta, gasoline and New New McDougall-Segur, crude. The last was producing 100 barrels a day by bailing, and a pump is being installed.

CANCER

Great Success of
Cantassium Treatment

A well-known London surgeon and recognized authority on Cancer has created world-wide interest in the discovery that Cancer is due to a deficiency of potassium "salts" in the body, which causes the cells to break down and become malignant. In order that every one may learn

The Real Cause of
Cancer

a remarkable book has been specially written.

This book will be sent free to patients or any one who is interested in the most successful method of fighting "THE CANCER SOURCE."

The following is a list of the chapters:

1. The Limitations of Surgery; 2. Some Doctors Oppose Operation; 3. What Cancer Is; 4. Why the BODY CELLS BREAK DOWN; 5. Infectious Cooking Methods; 6. Common Errors in Diet; 7. Vital Elements of Food; 8. Medical Endorsements of Our Claims; 9. The Chief Minerals of the Body; 10. The Thyroid Gland; 11. Aspirin; 12. Lime Begins to Accumulate; 13. Potassium Causes Lime Excretion; 14. Great Value of Potassium; 15. Parts of the Body liable to Cancer; 16. Parts Which Are Seldom Affected; 17. How a Doctor Can Help; 18. Deathrate From Cancer; 19. Arterial Sclerosis and Old Age; 20. Rheumatism, Gout and Kindred Complaints.

With this book are a number of interesting case reports treating the great value of "Cantassium Treatment" in various cases. The treatment is simple and inexpensive, and can be easily taken in one's own home. Apply for free book to Charles Walter, 51 Brunswick Avenue, Toronto, Ont., Canada.

HAMILTON Established 1850 ONTARIO

Publicity As the Basic Factor In Development of Markets for Natural Products of Canada

Publicity as the basic factor in successful salesmanship is receiving an increasingly large measure of attention at this time. The movement is not confined to this continent, where the art of advertising was first cultivated. It has spread to Great Britain and the continent of Europe and before long the world is likely to see a rivalry in that direction that cannot but exert a marked educational effect. Addressing the annual convention of the Fruit Growers' Association of Ontario and the Niagara Peninsula Fruit Growers' Association at Hamilton, when presenting the report of the work of the Canadian Horticultural Council for last year, Mr. E. B. Luke, of Montreal, stressed the importance of an organized campaign of advertising. Voicing the opinion that the Canadian apple was the finest in the world, he pointed out that through advertising, fruit growers could educate the public to eat a baked apple instead of a grape-fruit for breakfast. Instead of sending our money out to foreign countries, Canadians should buy their own products. This is sound advice, and the way to give it practical effect is by utilizing in every possible direction the publicity methods that have proved their ability to create gigantic and profitable business enterprises.

Earlier in the year Mr. J. Allan Ross, Canadian manager of the William Wrigley Company, a convincing example of a concern built up and sustained through extensive advertising of a product of defined quality, declared in Toronto that no land nor people is blessed with greater semi-dormant riches than Canada. He pointed out that Britain and the United States provide a market of 150,000,000 people to whom the offer of Canadian opportunity can be made. But the process will be very slow if an intensive selling of that opportunity is not carried on in every sound and reasonable way over the next five years. Mr. Ross suggested that a sum of \$8,000,000 should be placed in the Federal budget every year for the next three years to be spent specifically in telling the people of Great Britain and the United States about Canada during the next three years, her golden opportunity and certain future. That, he said, would be good salesmanship. Possibly mention of a sum like \$8,000,000 may seem ridiculous to many people. But when one considers the immense sums appropriated by commercial concerns for publicity purposes that have only a small fraction of the wares Canada has to offer, the suggestion assumes another aspect. Judiciously planned and expended, advertising is really an investment with much greater certainty of profit than can be assumed in the case of less extensive and varied marketable offerings.

Would Produce Sugar for Prairies

Alberta Sees Possibilities of Supplying Sufficient Sugar for Western Market

The possibility of Alberta becoming the domestic producer of sugar for the entire Prairie Provinces was suggested by T. G. Wood, district manager of the Canadian Sugar Factories at Raymond, who stated there was room for at least eight or ten more factories with a capacity of 1,000 tons of beets per day. Producing sugar for the entire population would mean the utilization of about 100,000 acres of irrigated land which would employ the energies of 8,000 to 10,000 farmers and provide farm labor for approximately 6,000 to 8,000 men. The one factory in operation has already absorbed about 500 European laborers as hand workers on the crop.

Punishing Profiteers

Prolific grocers are being punished in a new way by the Paris police, who forbid them to make their usual sidewalk display of goods for varying periods. When sentencing offenders to withdraw their wares from the sidewalk the Prefect tells them: "Your customers will know why you have no display, and they will know they will do well not to patronize you."

Achieve Production Of Synthetic Gasoline

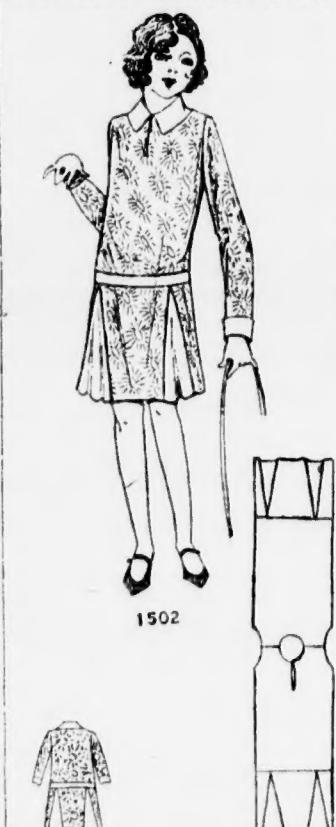

Method Has Been Discovered by French Engineers is Report

Synthetic production of gasoline on a commercial basis at two thirds of the present cost is announced as achieved by two French engineers, Albert Prudhomme and Eugen Roudry. Development of their method was supervised by an engineer for the mines commission of the chamber of deputies and is declared to be of national interest.

A small plant is said to be actually extracting five gallons of gasoline, four of fuel oil, and valuable sulphur from a ton of lignite. There is estimated to be enough lignite available to supply France with gasoline by this method for 150 years.

The process consists in distilling lignite gases from which the various products are extracted by chemical processes already known. These processes, however, are modified by the introduction of metal particles which facilitate the chemical action to a degree hitherto unattainable.

An Attractive Frock for Many Occasions

This frock shows the charm of combining two materials—so smart this season. The skirt has two godets in front and two at the back and is gathered to a bodice having a becoming round collar and long tight-fitting sleeves finished with trim cuffs. A narrow belt of the contrasting material completes this chic frock. No. 1502 is in sizes 8, 10, 12 and 14 years. Size 10 years requires 2½ yards 36 inch material for the dress, and ¾ yard 36 inch contrasting for godets, collar, cuffs and belt. Price 20 cents the pattern.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically, by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

Combatting the Weed Pest

Aggressive Campaign by Farmers Would Soon Bring About Marvellous Change

The world's greatest Teacher, in making applications of truth, referred to the flowers of the field, "how they grow; they toll not, neither do they spin." In Western Canada, its beautiful native flowers are being rapidly eliminated by cultivated fields, and much of the virgin beauty of the prairies is gone forever. In their place we have waving fields of grain, which, while not appealing so much to the aesthetic in man, does supply his daily wants.

In these vast fields, which are so much admired, there is a serious menace showing itself more and more each year. This is the weed pest. The farmer wants to get busy. Consider how the weeds grow. If we may judge by their prolificacy it certainly looks as though there was considerable toll ahead for the farmer if he hopes to combat the weed pest. Useful plants deplete the soil fast enough without having it done by weeds, which are almost useless to both man and beast, at least so far as is known at present.

What a short-sighted policy it looks to see so much of our grain fields taken up by useless weeds of various kinds. We believe present conditions can be vastly improved and the matter is entirely up to the farmers themselves. If they would band themselves together and formulate a live aggressive campaign, a year or so would see a marvellous change. When we realize how much good grain is crowded out by weed plants, the loss in yield, paying for twine and threshing, and carrying to market that which in the end the farmers are docked for, surely good interest would be earned for the effort put forth. Better to get busy at once for each year you toll not in this matter, the stronger and more firmly entrenched becomes the enemy. Economists and others may tell our farmers about these things, but the farmers are the only ones who are able to apply the remedy.

Liza was on the witness stand. "Are you positive," inquired the prosecutor, "that you know where your husband was on the night this crime was committed?"

"Ef Ah didn't," replied the witness firmly, "den Ah busted a good rollin' pin ovah an innocent man's hadd, dat's all!"

Government Action Is Urged To Protect the High Standard Of Canadian Seed Wheat

Western Hay for China

Two Hundred Tons of Alfalfa Shipped to the Orient

Two hundred tons of alfalfa hay were shipped recently from the Lethbridge, Alberta district for China—the first shipment of Canadian hay to that country so far as is known. The hay was moved to the Pacific coast in a special C.P.R. through freight of 20 cars and was loaded at Vancouver on the Blue Line Tyndareus for Hong Kong.

The order for the large shipment was received by W. C. MacKenzie, manager of the Southern Alberta Cooperative Association, from the British government agricultural department, London. It is thought that possibly the hurried order was brought about by the war in China and the concentration of British emergency troops in the disturbed area.

Only No. 1 well baled hay was sent in the hope that the shipment will be the opening of a large trade with the Far East.

Diversified Farming

Alberta Farmers Getting Away From Straight Wheat Growing

Alberta, formerly almost 100 per cent. straight wheat farming country, has changed radically in this respect in the last fifteen years, and although the wheat yield in the province in 1926 was 113,600,000 bushels, this represented only 45 per cent. of the value of the agricultural products, which totalled \$261,000,000—the greatest in the history of Alberta. Fodder crops are climbing rapidly in the percentage table of values, being now 21 per cent., while dairy products are now 8½ per cent.

Chief Scout Celebrates Birthday
Sir Robert Baden-Powell, founder of the Boy Scout and Girl Guide movements, celebrated his 70th birthday recently which was also the birthday of his wife. Both are at present in South Africa. There are now 2,000,000 members of the organization which Sir Robert founded in 1908 "to promote good citizenship in rising generations."

Action to amend the Dominion Seeds Act, to protect the grade of Canadian wheat, has been taken by the agricultural committee of the House of Commons, when it recommended that the act be amended to give the Minister of Agriculture the right to refuse a license for the sale of new varieties of wheat for seed purposes until the quality of the new variety has been passed on.

A resolution passed by the committee recommends that the Minister be given the right to refer applications for distribution of new varieties of seed to a board, consisting of the seed commissioner, the Dominion cerealist, a representative from the Canadian Seed Growers' Association, a representative of the provincial seed board of the province in which the application originated, and a representative of the wheat pool.

It was also urged that the Minister have power to revoke any license already granted for a new variety of wheat, upon recommendation of the board mentioned.

Hon. W. R. Motherwell approved the resolution and assured the committee that legislation would be prepared covering it.

E. J. Garland, Bow River, thought that agriculturists were in danger of being legislated out of business. A person buying seed wheat should be protected, but it should not be made almost impossible for a farmer to experiment with the growth of new varieties of wheat.

Hon. S. F. Tolmie, Victoria, B.C., said that the high standard of Canadian wheat should be maintained by the strictest means. Every freedom should be given a farmer to try to develop new varieties, but full scope should not be allowed the "quack" growers to dump their products throughout the country without first proving the value of the variety.

Big Trade With Russia

Soviet Republic Places Heavy Orders For Canadian Agricultural Machinery

Orders for agricultural implements placed in Canada by the Union of Soviet Socialist Republics this year to date are already twice as large as those placed with Canadian firms for the whole of 1926. According to figures supplied by the U.S.S.R. Trade Delegation in Canada, enough mowers have been bought here in the first six weeks of the present year to cut 21,000 acres per day for a twelve-day haymaking season; enough binders were bought to cut 600,000,000 sheaves of grain from 42,769 acres—these binders, if stretched out with a yard space intervals would cover 6½ miles, while the mowers, placed abreast, would span 11 miles. Some 9,000 horses will be required to draw these machines. Binder twine bought by the delegation, in the period mentioned, runs to 5,000,000 lbs. or just half of Canada's total exports to all countries in 1926. Incidentally, the delegation points out that while before the revolution only 500 tractors were in use in what was then known as the Russian Empire, some 70,000 are now being operated in the same territory.

Tomato is a Fruit

That old question regarding the status of the tomato, which has been stirring up strife for years, has finally been settled by Order-in-Council of the Dominion Government. Henceforth the tomato is to be termed a fruit, in so far as the Dominion Department of Agriculture is concerned, according to a statement by Fruit Commissioner McIntosh at the Ontario Fruit Growers' Convention in Hamilton.

Many Homestead Entries

Yet further increase in homestead filings in Western Canada are already recorded for 1927. The number of homesteads filed in the month of January was 343, as compared with 276 in January, 1926, and increase of 67. Filings in Manitoba were 56, against 27; in Saskatchewan 186, as against 145; in Alberta 115, against 100, and in British Columbia 6 against 4.

So valuable was the Mexican cancha bean up to fifty years ago that the population used it as money.

Veteran of Canadian Service

Mountie, the lead dog of the Chateau Frontenac huskie team, has seen five years active service with the famous Royal Canadian Mounted Police, in the far north. Four years ago he was brought from La Pas, Manitoba, as lead dog for the team in Quebec.

Now in his old age he has every care and attention, eleven years of faithful service should have some recompense. This dog is almost human in every way, and particularly where age is concerned; this he respects, and often asks in an insistent manner to be put into the team. Beau

WORLD HAPPENINGS
BRIEFLY TOLD

The French court of cassation, the highest court of the country, has ruled that pedestrians are subject to traffic rules like vehicles.

The discovery of a new star of the twelfth magnitude has been announced at Cracow. It was discovered by Assistant Professor Casimir Kordelewski, of Cracow University.

Mrs. Amanda Riel, sister-in-law of Louis Riel, famous rebel, is dead at Winnipeg. Mrs. Riel died on a street car from heart disease. She was born in St. Boniface, 55 years ago.

The United States has definitely proposed to Great Britain and Japan a three-power naval limitation conference to meet in Geneva not earlier than June 1.

Thomas P. Dawson, 69, who attained international prominence during the Great War for his relief work in Belgium as an associate of Herbert Hoover, died recently in Providence, R.I.

The Dominion Government's ice-breaker, the Stanley, has entered the Halifax drydock for a thorough overhauling and refitting preparatory to a voyage to Hudson Bay on survey work.

Opening of the new United States legation at Ottawa may have to be deferred until after July 1, because there are no funds for that purpose, due to the fact that congress failed to enact the deficiency appropriation.

The Royal Air Force is planning an attempt to break the world's distance flight, in a non-stop aeroplane run. A powerful plane is to start from Cranwell, Lincolnshire, and fly in the direction of British India as far as its fuel and other equipment will permit.

The Canadian Government has been invited to send a delegation to a world agriculture congress called by the Italian Government to convene at Rome, April 25 next. The Department of Agriculture stated it was unlikely that Canada would be represented.

HEADACHE, COLDS,
COSTIVE BOWELS,
TAKE "CASCARETS"

To-night! Clean your bowels and end Headaches, Colds, Sour Stomach

Get a 10-cent box now. You men and women who can't get feeling right—who have headache, coated tongue, bad taste and foul breath, dizziness, can't sleep, are bilious, nervous and upset, bothered with a sick, gassy, disordered stomach, or have a bad cold.

Are you keeping your bowels clean with Cascarets, or merely forcing a passageway every few days with salts, cathartics, pills or castor oil?

Cascarets work while you sleep; cleanse the stomach, remove the sour, undigested, fermenting food and foul gases; take the excess bile from the liver and carry out of the system all the constipated waste matter and poison in the bowels.

A Cascaret tonight will straighten you out by morning; a 10-cent box from any drug store will keep your stomach sweet; liver and bowels regular, and head clear for months. Don't forget the children. They love Cascarets because they taste good—never gripe or sicken.

Mother Givens' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective is mild.

1857

Women of Canada Pay Striking Tribute to Aluminum — — the Modern Metal

FROM Windsor, Ontario, to Hudson's Bay, from Halifax to the Rockies, RED ROSE TEA within the last few weeks has scored an extraordinary increase in sales.

It is because we have stopped using paper packages, and are again packing this finest of teas in the old, familiar Aluminum package of years go.

The reception it has been given demonstrates beyond all doubt that housewives of Canada recognize Aluminum as the perfect container.

For more than thirty years we have been experimenting with packages — trying lead, paper and Aluminum — seeking always a material that would protect and be worthy of Red Rose quality.

But it was only after Red Rose has been offered to the public in all these packages — first lead, then Aluminum, then paper — that the great advantages of Aluminum were proven.

Aluminum keeps out moisture, preserves the flavor and protects the quality. Paper packages, on the contrary, absorb moisture which occasionally impairs the quality.

So now and in the future RED ROSE TEA will be packed in the Aluminum package, as it was in years gone by.

SUNDAY SCHOOL LESSON

MARCH 20

THE CHRISTIAN'S HOPE

Golden Text: In my father's house are many mansions; if it were not so, I would have told you; for I go to prepare a place for you.—John 14:2.

Lesson: John 14:1-3; 2 Corinthians 5: 1-10; 1 John 3: 2, 3.

Devotional Reading: Revelation 21: 1-7.

Explanations and Comments

1. The Promise of Christ, John 14: 1-3.—"Let not your heart trouble; be He in God, believe also in Me."

"Twas the Master himself who said it.

To the sorrowful little band,

Facing an hour of darkness

That they could not understand."

"In my Father's house are many mansions," thus Jesus comforted them. Our word "mansions" meant originally merely a place of shelter, and accordingly the margin of the Revised Version has the word "abiding places."

In speaking of his own death, Jesus said, "I go away," "I go to the Father." So Paul said, "The time of my departure is at hand." They were travellers, setting forth on a journey to a better country. So Christ would have us think, not that we are going to die, but that we are going to set forth on a journey that ends at our Father's house.

"If it were not so, I would have told you." In the minds of all peoples there is a belief in a future life. This belief, Jesus's words tell us, is true, for otherwise he would have disillusioned the minds of his followers.

"I thank thee, O Father, that there is a voice within me which contradicts the silence of death."—George Matheson.

The Swede Smiths

While Americans and Englishmen wade through lists of Smiths in their telephone directories, the Swedes are having their difficulties with the Andersens. It has become so difficult to pick out the right Andersen that the postal department has suggested giving a premium to those who change their names.

The first main station for radio broadcasting in Ireland is being established in Dublin.

For Sore Throat

Rub throat and chest with Vicks; cover with warm flannel. Its double direct action (inhaled and absorbed) brings welcome relief.

VICKS
VAPORUB

The quickest and most effective relief from Lame Back and all Kidney and Bladder Troubles is Gin Pills. They promote health by restoring the kidneys to their normal action of filtering the poisons from the blood.

CHIEF FEATURES OF ONTARIO'S NEW LIQUOR LAW

Toronto.—The following are the chief features of Ontario's new Liquor Control Act introduced in the Legislature by Premier Ferguson.

All liquor must be purchased through the Government agency.

Permits are of five classes, as follows:

Individual permit to a resident of Ontario.

Individual permit for any period not exceeding one month to a tourist or temporary resident.

Special permit to physicians, dentists, veterinarians and those in scientific or mechanical pursuits.

A special permit for ministers of the gospel for sacramental purposes.

The board has further authority to issue a special permit as authorized by the regulations for the sale of liquor for the special purpose named in the permit.

Druggists are not permitted to dispense liquor.

Breweries and distilleries can only sell in the province to the board under a permit from the board.

No liquor may be consumed in a public place. All liquor must be consumed in the residence or temporary home of the purchaser.

The commission will establish stores for the sale of any or all classes of liquor at such points as they may deem best in the public interest but no store may be established in any municipality where the Canada Temperance Act is in force, nor where a bylaw under local option had prohibited the sale of liquor at the time of the coming into force of the Ontario Temperance Act in 1916.

Light beer, as defined by the act, and which is ordinarily known as 4.4 beer, may be sold in such places as the board designates, under permit from the board.

There shall be no public advertising of liquors.

No person, except with the permission of the board, shall have in his possession in this province any liquor not purchased from the board. This section takes care of the private stock that any citizen may already have that is legally purchased and the board has absolute control over all the liquor that is found in Ontario.

The board may appoint a staff of inspectors, and this staff, in co-operation with the provincial police and local constables, shall cooperate in the enforcement of the law.

All prosecutions will be conducted under the Department of the Attorney General of the province.

Any person found selling liquor in Ontario will be imprisoned for the first offence without the option of a fine. There is a great variety of penalties for other offences under the act.

Arms Parley This Fall

Geneva.—The League of Nations council adopted a resolution to the effect that the international conference for supervision of private manufacture of arms should be held this fall.

Had Terrible Headaches and Was Unable to Sleep

Saskatchewan Man Used Dodd's Kidney Pills With Great Success

Mr. N. Zilan Was Relieved of His Trouble After Taking Short Course of Dodd's Kidney Pills.

Laventure, Sask. (Special) — "I want to tell you just what your Dodd's Kidney Pills have done for me," writes M. N. Zilan, a resident of this place. "I had terrible headaches and could not sleep but after taking two boxes of Dodd's Kidney Pills I commenced to feel fine. I cannot praise this kidney medicine enough and would not be without it in my home."

Persistent headaches and sleeplessness can usually be attributed to a run down and exhausted condition. Other symptoms such as irritability, tired languid feelings; depression and loss of energy are also the outcome of this condition. It is therefore necessary that you take a few weeks treatment of Dodd's Kidney Pills to restore vitality and generally tune up the nervous system.

Interim Pool Payment

\$27,000,000 Being Distributed to Farmers in Three Prairie Provinces

Regina, Sask.—The Canadian Cooperative Wheat Producers, Limited, central selling agency for the three provincial wheat pools, announces that the first interim payment for the 1926-27 crop is being mailed from the offices of the Manitoba, Saskatchewan and Alberta pools. The amount of the payment is officially stated to be 15¢ per bushel for spring wheat and spring wheat mixtures, 20¢ per bushel for Durum wheat and Durum wheat mixtures, 8¢ per bushel on all grades of oats, 8¢ per bushel on all grades of barley, 12¢ per bushel on all grades of flax. A total of \$27,000,000 is thus distributed to prairie farmers in the three provinces, according to Mr. McPhail.

Saskatchewan's share of the \$27,000,000 being distributed as a result of the interim wheat pool payment on the 1926-27 crop amounts to between \$17,500,000 and \$18,000,000 according to an official statement issued by the Saskatchewan Cooperative Wheat Producers, Limited.

Officials of the pool call attention to the fact that this huge sum of money, scattered widespread over Saskatchewan just prior to seeding, represents one of the tangible benefits of the pool system of marketing, which was absolutely unknown prior to the organization of the pools in 1923 and 1924. The beneficial effect of these payments is not only recognized and greatly appreciated by pool members, but it is recognized by bankers and statesmen alike.

CHINA RESENTS INTERFERENCE OF RUSSIAN SOVIETS

Think Britain Favors War Craft Limitations

Officials at Washington Believe in Ultimate Success of Plan

Washington, D. C.—London and Tokyo news advices clearly indicating that Great Britain and Japan will accept the Coolidge proposal for a conference with the United States at Geneva this summer on auxiliary war craft limitation are taken by officials here to mean that such a project ultimate will be brought about.

While there has not been much doubt as to the Japanese attitude toward such an arrangement British sentiment in the past generally has been against any limitation of anti-submarine craft as long as her continental neighbors refused to limit submarine construction and officials have looked to Great Britain to remove the greatest obstacle in the way of a three powers parity.

Public opinion throughout Great Britain as interpreted by that country's officials was described as demanding British acceptance of any plan for naval limitation.

Geneva despatches carried the additional information that Great Britain would insist on linking the three power parity with France and Italy not exceeding certain tonnage in cruisers, submarines and torpedo boats.

Engine Trouble Ends Trans-Atlantic Flight

Oil Pipe in Motor Blocked Says Message From Uruguayan Flier

Madrid.—Paralyzation of an oil pipe in the motor of his plane brought the trans-Atlantic expedition of Major Tadeo Larre-Borges, Uruguayan flier, to an abrupt end while he was flying from Casablanca, Morocco, to Cape Juby. He made this known in a brief message received by the Uruguayan minister through the high commissioner at Cape Juby. The message said the failure of the oil pipe to function made it necessary to stop and that the plane was destroyed when it alighted.

He explained that his statement was made at the request of the British and Dominion governments. It did not mean that the Dominions would lose their prerogative of approving or rejecting treaties but that acceptance of treaties by Great Britain and the Dominions would be facilitated.

Ottawa.—The statement made by Sir Austen Chamberlain in the council of the League of Nations as to the form of signature which it was hoped would be adopted for the British Empire in signing League documents, is in line with the decision arrived at during the Imperial conference. The Canadian Government also received detailed information as to Mr. Chamberlain's statement.

Ottawa.—Canada's giant tee breaker Mikula has reached the Gulf of St. Lawrence, and conditions there are propitious for an early opening of navigation, the Department of Marine and Fisheries has been informed by a wireless from the ship.

Permitted to Fly Over Canada

Ottawa.—The Dominion air board has granted permission to the Ford Motor company to fly planes over Canadian territory in connection with the company's proposed daily plane freight service between Detroit and Buffalo, N.Y.

LOSS OF LIFE BY EARTHQUAKE IN CENTRAL JAPAN

Tokio.—Thousands of refugees in Central Japan, shivering, hungry and in need of medical aid, struggling to bring order out of the chaos created by the earthquake, which already is known to have taken a toll of more than 2,000 lives.

The Home Office stated that its latest advices showed 2,275 persons were killed and 3,041 injured. Information received by Tokio newspapers, however, indicated the total dead in the entire earthquake region would number more than 3,000, while one newspaper estimated the toll would mount to 5,000, with 50,000 to 75,000 homeless.

The correspondent for the Tokio Asahi Shinbun, who traveled through the stricken area, reported from Miyazu that the scenes in Mineyama, where more than 1,000 persons were killed, and Amino, were heart-rending. Refugees, he said, were exposed to snow and rain while only a small amount of relief was available.

Many relatives of victims of the quake were digging in the ruins of devastated villages seeking the bodies of fathers and mothers and sons and daughters. Funeral pyres were built and bodies cremated. Other inhabitants of the towns worked with police and soldiers in extracting bodies and giving aid to the injured.

Shallow graves were dug in the snow-covered ground, even small children assisting in the burial rites. Bits of half-burnt sticks, raked from the debris, were used as incense sticks for the offering of prayers before burial. Japanese and Christian preachers and priests were everywhere aiding and comforting widows and orphans.

The newspapers' correspondents general reported that that the lack of medical supplies and food was the greatest hardship for the refugees. Injured men and women along the broken roads asked every passerby if he were a doctor, so great was their need for medical attention. Doctors and Red Cross nurses were coming into the region rapidly and it was expected they soon would be able to ameliorate the situation.

The roads throughout the region were reported literally lined with the bodies of victims unclaimed by relatives and friends.

London Worker Has Terrifying Experience

Was Swept Into Sewer by Rush of Water and Carried Many Blocks

London.—A workman engaged in sewer work in Chancery Lane had a terrifying experience when a sudden rush of water swept him into the sewer. From Chancery Lane he was swirled at great speed down beneath Fleet Street and then into Ludgate Circus, where the sewer enters the subterranean river Fleet now in full flood.

He was passed along several other streets and finally was shot out into the river Thames beneath Blackfriars Bridge, where he was rescued by river police. Beyond severe exhaustion he was not seriously hurt.

Relieves Indigestion Very Quickly

Men and women all over the world have been taking a small, easy to swallow, purely vegetable pill, after meals, to prevent and relieve attacks of indigestion and sick headache.

Millions also recommend them as a mild, gentle laxative, moving the bowels free from pain and leaving a pleasant after feeling.

These little pills are a doctor's prescription and have been sold by all druggists as

CARTER'S LITTLE LIVER PILLS.
They do not contain Mercury, Calomel or habit-forming drugs.

Try them to-night and feel refreshed to-morrow.

All druggists recommend

CARTER'S LITTLE LIVER PILLS.
Men, women and children take them as a daily regulator.

All druggists, 25c. and 75c. red packages.

First of 3,000 Families for Canada in 1927

Mr. J. Malcolm, Canadian Government Agent, Glasgow, Scotland, taking charge of the first family of the year to leave Scotland under the 3,000 Families Settlement Scheme. The family comprises Mr. and Mrs. Alex. L. Thomson, and their four children from New Deer, Aberdeenshire, who proceeded to Canada on board the Canadian Pacific liner "Montauk," to take up farming in British Columbia. They travelled all the way for the inclusive charge of £16, whereas the full fare for the family is £112.

**POOL METHOD
SAFE and SANE**

The individual farmer is not qualified to sell his wheat to the best advantage in the markets of the world. He is a producer primarily and his time is taken up with the problem of tilling the soil and raising and harvesting his grain.

Then comes the time to sell. The farmer must market at the point of production and someone else sell his wheat at the point of consumption. Thus, for a very few days in the year the producer is a seller. What chance has he against men who have spent a life time learning the ins and outs of the grain marketing business and who are out to buy at the lowest possible price?

What chance has the producer to really know what he is entitled to get for his product in the world's market? He must simply accept what is offered even though he knows that he is not getting a fair price?

The Wheat Pool is in existence to correct this haphazard method of selling and to retain for the farmer his rightful profits.

The Wheat Pool is not organized on a dividend paying basis. Aside from the deduction for commercial reserve, and the cost of administration, all the money received is turned back to the wheat producers. The pool is organized for the single purpose of selling wheat to the best advantage in the markets of the world and returning every cent possible to the producer.

The Wheat Pool method is the safe and sane method for the Alberta wheat grower.

When news is scarce we have but little stock to fall back on. If we try to be "funny we phail," and if we produce anything containing any merit outside of itemizing we dare not publish it lest our readers will say, "that crank." If we touch on politics we hear the cry of "calamity howler." If at times we feel religiously inclined and should make slight allusions, somehow the pith will get punched out and someone will come into our sanctum and ask: "what did you intend to convey?" Sometimes we spell bad and Betsy, who spells by intuition will ask: "how do you spell such a word?" We go on and spell it according to Hovle. "Why didn't you write it so then?"

These words will creep in and then the compositor will doubtless say, "old fool, I wish he would stop writing and learn to spell." Our greatest fault in this direction is that we are too lavish with letters. We have been caught with two d's in widow and two t's in city, all from a desire to be liberal and accord the "intrinsic value" in all cases. It is too late now. We have made a mistake in our calling, having had a touch of most everything. Sometimes we think we ought to have been a clergyman, then we could have walloped our congregation with no back talk.

She: I like your cheek.
He: Not half as much as I like yours.

Passengers aboard the Canadian Pacific Empress of Scotland were not deprived of visiting China on the present round-the-world cruise of this ship, on account of the recent trouble in that country. Word from the cruise director is to the effect that the passengers received a warm welcome at Shanghai and that the Chinese were most friendly.

A new Canadian bird, the "turken," has made its appearance. It is a cross between a turkey and a Rhode Island hen, and was first brought to public attention at the Edmonton poultry show. George Spurgeon, who raised it, claims that it will effect a revolution in the poultry business, as it combines the best features of the hen and the turkey. It has a hen body and a turkey head.

Where Wolves Will Run With Huskie Dogs

An entirely new and unique test will soon be made at the Chateau Frontenac, Quebec, by Arthur Beauvais, driver of the Frontenac dog team. He has three wolves which he has reared from babyhood. These have been kept in a kennel in the same building with his huskies. They are shy little things and appear as aliens among the dogs. They are not as playful as pups, and to overcome their shyness Beauvais often puts three little huskie pups in for playmates when they forget themselves and seem less homesick for their parents and the great out-doors.

These little creatures are now only eight months old, yet in this short time have learned much of mortals, and they have already had one trip to Boston where they were exhibited by the Canadian Pacific Railway at the Sportsman's Show.

One morning a brand new sporty looking collar was placed on one, and the dignity this wild animal suddenly acquired was amazing. It was like a child with new shoes. It turned its little head first one side, then the other and sat down in a sedate manner, all four feet together and held its head high haughtily and said with its eyes "now look at me". Do wild animals understand? Yes indeed, that wild beast was as self-conscious as any human decked out in a new regalia.

Shortly after the return of the wolves from Boston, one of the little

creatures sprained its shoulder. When Beauvais entered the building and went up to the kennel, or compartment allotted them, which has wire netting around, the poor little thing came up to him for sympathy. It was duly rubbed with lotions and cared for, not in the least resenting anything which was done for it.

A cute little sleigh, French-Canadian in design, has been built for it and the picture shows little Master Beauvais all ready for his first ride as soon as the wolf is harnessed. It is now three months since this wild animal has been tame enough for this little child to play with, and one wonders if the old saying "A little child shall lead them" can be applied in this instance. It can, however be stated that when this picture was taken the wolf had to be literally pulled out of the street back to its kennel. It was interested in the people around, the dogs, the taxis and sleighs which passed as he posed for one of his many pictures taken lately.

It will indeed be worth while to follow the adventures of a wild creature from the woods of Quebec province, into the biggest organization of its kind in the world, a frequenter of the Chateau Frontenac, one who has already taken trips, and who will in time know the hearts and kindness of people it will come in contact with.

CHAPTER XXX.—Continued

"That I wouldn't do," he declared promptly. "If you have any other reason than a sudden desire to enjoy my admirations without interruptions, I don't want to know it. I am jealous of my vanity."

"Then you shall be flattered," she returned gaily. "I am in the mood for you. Someday there's got to be a battle between us, between you and me, Roddy. Let's have it now."

He was on his feet in an instant and standing over her. She stopped with her eyes, and held him half bent down to her. She did not stir, nor put up a hand; it was just the indescribable something in her eyes.

"No, not just now," she said, her lips shaping into the utmost of their provocativeness. "You mustn't be too literal. But tonight, perhaps, or tomorrow night—or when the moment arrives. But as soon as we can, I want to know how far coming off."

"Damn you! Are you playing with me?"

No, Roddy, I've never played. Not since my money came. Someday I want to play. After we've had our battle, perhaps. What shall we do first? Let's go through the mist to some place. Why not up La Turbie?"

"Tonight?"

"Tonight. That's what I must hurry home to change for. I shall want to look very alluring."

He straightened and looked down

Mrs. L. Schooley

Evans' Studio

London, Ont.—"Ever since I saw the great benefit my daughter received from Dr. Pierce's Favorite Prescription during her second expectant period, I have never neglected the opportunity to recommend it to every prospective mother. I was with my daughter when she was miserable and sick. Thru my advice she took Dr. Pierce's Favorite Prescription, and from the very beginning she gained in health and strength, was able to be up, and attended to her household duties right up to the last. She had comparatively no suffering—the least I ever witnessed. My only regret has been that I did not know of this wonderful medicine while bringing up my own family." Pelt Raising in Canada

Climate is Well Suited to Production of Superior Skins

Raising foxes for the market continues as an increasingly active and productive industry in Canada. Last year the Dominion exported 5,600 live foxes, valued at \$1,440,000. The United States bought 4,300 of these for breeding purposes. France has undertaken to raise foxes and invested \$150,000 in Canadian stock last year. Finland has established its first fox farm, which has been placed in charge of an experienced Canadian breeder.

The Canadian climate is suited to production of superior pelts of all kinds. The breeding history has not stopped with foxes; some of the fur farms produce mink, marten, raccoon, skunk, fisher and karakul sheep. Prices of all furs promise to remain so high that breeders who meet with any success are assured of big financial returns.

seems to have other plans for the evening."

"And so have I," she told him. "I'm going up La Turbie with Roddy. He's often wanted me to go up with him, and now I've promised."

"Sorry." She did not wait for the inevitable protest against climbing the narrow, winding road that ventured up the steep La Turbie mountain to the isolated resort above La Turbie village, but tripped on up the stairs. Brandon looked after her. Even women who were careless sedona went up La Turbie to dine or dance at the famous roadhouse atop the hill, unless in groups. The gayest of the hidden rendezvous along the coast, it was, in some respects, also the most forbidding. One always went up La Turbie but one did not, customarily, talk about it. After he had stood for a time in deep reflection, Brandon went onto the Amette veranda and peered out into the damp fog. Accustomed as he was to the Riviera he estimated the feel of it to his nostrils and his fingers. He appeared to gain, from his conclusions, some definite satisfaction.

He summoned a servant and inquired if Mademoiselle Coutant was still occupied in her boudoir. The maid reported that her mistress was, and would not be down for some little time. "You may tell her," he ordered, "that I shall not be staying to dinner. If she won't mind."

A half hour later, when he had dismissed the Amette car which had taken him back to Monte Carlo, Brandon summoned his valet and demanded that a suit of heavy tweeds be laid out for him. When the man had completed his master's order:

"Go at once to the garage of the Italian in the Boulevard du Midi and ask for Antoine. If he is not at hand, find out where he can be reached immediately. When you have him say that I want him to drive me as soon as he can be ready up the mountain. If he objects to the mist, tell him the thicker the fog the heavier his purse will be, and that much more for his men. Be sure, however, that it is an

She stopped with her eyes, and held him half bent down to her.

"If we drive carefully we can make it," he concluded. "I'll take the wheel myself. You won't be afraid to trust yourself with me, shall you?"

"That's what I want to find out, Roddy. So many people are skeptical of me. I want to know if they're right—or wrong."

He laughed. "I shan't ask you to stay beyond the hour," he declared. "I'll need some time alone to try and figure you out. What's happened? Something has, I am certain."

"Nothing," she answered him. "Nothing, that is, that wasn't expected."

A servant notified them that Mademoiselle's mount had been brought to the door before either of them realized that the hour had flown. She had induced Kenilworth to tell her some of the histories of the souvenirs which were strewn about the room in which the their tea had been served, and she was enthusiastic about them.

When she went out to her horse she found that the groom also had brought a mount. Kenilworth nodded his approval. Joanna begged to be allowed to ride back to Amette alone, declaring her faith in the lights along the sea boulevard and her horse's instinct, but Kenilworth was firm.

"I should take you along myself," he explained, "but I shall want a look at the car. It's a stiff climb to La Turbie. I always want to be satisfied about my brakes."

At Villa Amette, Joanna found Brandon awaiting her. "I have invited myself to dine," he explained, "and no one seems to object. Perhaps you will go along for an hour or two at the Casino, afterwards. There won't be a crowd and we can drop in for an act at the theatre. Yvonne

alone himself you find. Otherwise return quickly."

On her way to her own boudoir, Joanna stopped at Yvonne's. She too, it seemed, was particularly painstaking at her evening's toilette. Her maids were flushed and nervous under the temper of their mistress. That they were having difficulties in pleasing her was evident from the litter of glittering gowls angrily tossed into heaps on the chaise lounge, chairs and even tables. For a brief instant Joanna stood in the boudoir door, beneath the curtains that shut off Yvonne's sitting room; just long enough for her eyes to harden and narrow. Then she announced brightly that she would be going out with Kenilworth and that she hoped her running away would not interfere with any plans for the evening Yvonne might have made. Yvonne glanced at her sharply. She concluded, however, that there had been nothing hidden in Joanna's tone. "I have no other plans than a run into the Casino, perhaps," she said. "Betty Weymouth is having something or other tonight at her place, and I did promise that you and I would drop in, but that is not important. If you are running away by yourself I shan't trouble."

Joanna went over to the other woman and, stooping, lightly brushed her cheek with her lips. "Then I shan't be seeing you till tomorrow sometime. It will be early, though, for I shan't be able to sleep with tomorrow night so close." She stopped again at the door as she went out, to say, as if it were an afterthought: "Tonight I'm going up La Turbie—with Roddy. It will be great fun on the mountain tonight."

Yvonne turned quickly, but the girl had dropped the curtains behind her. She waved both of her maids away, when they bore down upon her with Joanna's departure, and sat quietly in a study. Presently she looked up in to the mirror before her. She examined the reflection she saw there with an intent, abstract scrutiny.

From her face her gaze wandered to her throat, around which hung her most magnificent pearls, and then to her gown—she had chosen a thing of pink in orchid hues that had come that day from her Paris couturier's. She shook her head, in response to her mental conclusions upon the ensemble the mirror reflected.

"You may take off the pearls," she commanded a maid, "and bring me diamonds. A lot of them. And I shall not wear this gown after all. It's too innocent. I've something in burgundy; bring that." As if to herself she added, in a murmur that neither maid could overhear:

"Burgundy and diamonds. If I'm not mistaken that will do the trick."

(To Be Continued).

A SIMPLE TREATMENT FOR CHILDREN'S COLDS

Cold in the head is very common at this time of year, especially in the very young. Neglect of a cold is prone to lead to serious consequences. To relieve all congestion of the system is the first step in treating a cold, whether in infants or adults. For the very young, Baby's Own Tablets are the ideal means of doing this. Containing no narcotics or other harmful drugs they soothe the child's trepidness, relieve its suffering and ensure convalescence.

Baby's Own Tablets are without an equal for relieving indigestion, constipation and colic. They check diarrhoea; break up colds and simple fevers; promote healthy-giving sleep and make the dreaded teething period easy. The Tablets are the one medicine that a mother can give her little ones with perfect safety as they are guaranteed to be free from injurious drugs. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brantville, Ont.

Jerry "Have you ever thought seriously of marriage?"

Stranger—"Yeah! ever since the ceremony."

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that the makers claim. If you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

Jerry "Have you ever been up before me?"

Accused: "I don't know. What time do you get up?"

IN

THE BROWN DERBY

Jump in, there's plenty of room for the quickest time you ever made around the joy circuit. The Brown Derby isn't a horse race, but it's twice as fast.

Grain left Montreal for seventeen different countries in the 1926 season. Great Britain imported to the heaviest extent, followed in order by Holland, Germany, Belgium, Italy, France, Norway, Greece, Ireland, Portugal and South Africa. Great Britain took 39,291,763 bushels or 31 per cent. of the total exports from the Port, being also the heaviest purchaser of oats. Norway and Holland were the two largest buyers of rye.

The grain harvest of 1926 has left more money in the country than the greater harvest and somewhat higher prices of 1925, according to N. M. Paterson, president of the Paterson Steamship Company, and owner of a hundred country elevators in the West, with one other city elevator now being built at a contract cost of \$800,000 at Fort William. Mr. Paterson, who was interviewed at the Windsor Hotel in Montreal recently, having arrived from Winnipeg, is travelling with his father and mother, wife, six children and two nurses, by Canadian Pacific route, land and steamship, to England with a view to staying at Bournemouth for the next three months.

Steamship companies brought approximately 165,000 passengers to the Dominion in 1926, an increase of nearly 48,000 over the previous years. Third class passengers, the majority of whom were immigrants or new settlers, accounted for over 123,000. An outstanding feature of travel has been the development of tourist third class accommodation. Approximately 7,100 passengers of this kind were carried eastbound across the Atlantic from Canada and 8,650 transported westbound during 1926, making a grand total of this kind of travel of 15,750 for the year.

APPLE SAUCE

'Every little bit counts', said the convict as he served his first day of a life sentence.

Famous last words: "Step on the gas, it ain't whistled yet."

To make me sad these words are plenty.
Sorry old top, the bottle's empty.

A telephone operator is the only one that gets rings from strangers.

You can tell how popular a girl is by the number of hair nets she buys.

"It will come out all right in the end," said the gardener as he attached the hose to the faucet.

Here lies the mess of Sadie Smak. She rolled her hose on a street car track.

You would make a wonderful fireman.

How's that?
You never take your eyes off the hose.

An optimist is a man who jumps every time he hears a cork pop.

After all a wife is a wife, but you only have to feed a goldfish every two weeks.

The reason why some women wear tight shoes is that it is the only chance they have to get squeezed.

The increase in the net profits of the Canadian Pacific Railway for the first eight months of the year ending August 31st is \$6,814,895.76, according to a financial statement issued at the headquarters of the Canadian Pacific at Montreal. This is the increase in profits as compared with the profits for the same period in 1925. The increase in the gross earnings over the same period in 1925 is stated at \$12,691,364.57.

"Hell-Roaring Canyon," the scene of a dramatic incident in John Murray Gibbon's new novel "Eyes of a Gypsy" is the actual name of a remote valley in the Canadian Pacific Rockies as known to the guides and hunters, although the Geographic Board of the Canadian Government has just changed it to a less romantic name—"Numu Creek." The reason for the change in name is that there is another Hell Roaring Canyon in the Rockies which claims a prior right to the name.

The Ancient and Honorable Artillery Company of Boston, one of the oldest military organizations in the United States, being founded as an offshoot of the famous Artillery Company of London, in 1630, held their 289th annual field day and march past at Montreal, arriving at the Canadian Pacific Place Viger Station on October 2nd. About 250 members of this organization, representing the oldest families in the State of Massachusetts, took part in this event.

Farmer-Owned Elevators

At almost a thousand different points in the Prairie Provinces there are Farmer-owned Elevators. The overwhelming verdict of Western farmers is that Farmers' Elevators are absolutely necessary to the country, and that Farmers' elevators improve conditions where they are established.
